

ANSON Answers

Are there employment opportunities within the Anson community?

Imagine a commute without a car, or even one on foot or bicycle. At Anson, residents have the opportunity to work within blocks or even steps of their residences. Anson development plans include corporate campuses and offices for individuals and partnerships. Professional offices and medical practices offer residents convenience whether they are using the services, or working to supply them.

As part of the Anson community, workers have access to dining and shopping, as well as free rein to enjoy walking, biking and fitness trails, and other nearby parks and recreation areas. If Anson offices are a drive-to destination, office professionals still have easy access—immediately east of I-65 at the Zionsville exit or across SR334.

Anson is a Duke Realty Development.
